

Archbishop Curly High School Elevator Addition

**Address: 3701 Sinclair Lane
Baltimore, MD**

Owner: Archdiocese of Baltimore

A. R. Marani, Inc. was selected by the Archdiocese of Baltimore to construct this three-story addition based upon our experience in completing several similar projects. The addition was constructed while school was in session. ARM coordinated with the school to limit the effects of construction activities on classroom learning schedules.

The addition was completely constructed prior to cutting the new door openings into the existing building. The remote location of the addition required a temporary access road. Careful coordination with subcontractors and school personnel was necessary since access to the site crossed several sports fields which were in daily use.
