Hunt Valley Cold Box Facility

Address:

Hunt Valley, MD 21030

Owner:

Completion Date:

September, 2014
3,000 square feet

Architect:

Gaudreau & Associates

Project Description

A 3,000 sf, thirty foot tall explosion proof masonry and steel building was constructed to be used as a cold storage facility. The contract included the construction of the cold storage box inside the entire building. This project required particular attention to maintaining a complete air tight sealing of the building. Any air leaking into the building would cause condensation between the exterior walls and the cold storage box.

In addition, the building was constructed within the loading dock access area. Constant coordination with shipping and deliveries was necessary so that the trucks were not delayed from exiting or entering the building. Construction activities were scheduled around the shipping and delivery schedules.
