

Kittimqundi Community Church Elevator Addition

**Address: 5410 Leaf Tender Way
Columbia, MD**

Owner: Kittamaqundi Community Church

ADA access to the second floor church offices was provided by constructing a two story addition for an elevator. The existing building is an historic stone and timber structure which originally had stables on the ground level. The walls of the structure were over two feet thick.

New door openings were carefully cut through these walls and the removed stones were used to reconstruct the jambs and head of the openings. Sections of the interior timber framing were also reconfigured.
